

URGENT!.

Plans to expand Craig Field could bring Commuter Airline service into the heart of Arlington. JAA **forgotten** promises, incomplete and limited information presented for public evaluation does not give an honest picture of the far reaching effects and consequences of their plan.

Support Jacksonville City Council members Clay Yarborough and Bill Bishop and local property owners in their effort to stop a proposed expansion of the runway at Craig Airport. **Council Resolution 2007-984 which would uphold the decision of the previous Council to prohibit the Craig expansion.**

Your help is needed as we support the homeowners in the community who have been forced to mount grassroots opposition four times since 1970 on this issue. Despite a 2000 agreement in which the Jacksonville Airport Authority agreed NEVER to pursue expansion again and a decision by the City Council to oppose the runway expansion, the JAA is now asking the newly elected Council to ignore the previous decision and consider expansion once again.

Supporters will be speaking **Tuesday evening, October 23** at the regularly scheduled City Council meeting. Public comments start at 6:pm. Come out for the meeting to show support for our homeowners. **You do not need to speak,(unless you want to), simply show up.**

The meeting is held at City Hall, 117 W. Duval St. starting at 5 pm.

Please help us support the homeowners in our community.
